Formative, illuminating, paperless and engaging online assessment for children from birth to 11 years

The Comprehensive Assessment Solution for Child Reports and Analysis of Progress and Development

E2P +SEND
ASSESSMENT 0-11 YRS

KEY FEATURES

- Record and save evidence instantly to the assessment package (video, photo, and audio of children's work) using our Mobile App.

- Attribute evidence easily to children or multiple children whilst also including the developmental stage they are working at for early and primary children (e.g. 30 to 50 months, or Year 3 Mastery).

- Formative assessment of children with wide ranging needs:

  - Profound, multiple and complex conditions, autistic spectrum conditions, severe learning difficulties.

  - Pupils with behavioural social and emotional difficulties.

- Instantly produce professional, live, half-termly or termly reports including individual electronic records and observations of the child's learning enriched by photographic and video evidence.

- Reports can be viewed securely on-line, printed, or saved instantly from this package.

- E2P+SEND is a multi-lingual package allowing all members of the community (including parents) to collectively work towards a child's development.

- Parents can engage via their own login and contribute their own evidence of their child's progress and development to enable a shared and full understanding of each individual.

- Direct import from your MIS (e.g. SIMs, Integris G2) which populates the system with all class, year group, teacher and child information. No replication of data. No manual input or manual data analysis and instant report generation.

- Moderation capability including the creation of shared exemplification files, with photo and video evidence.
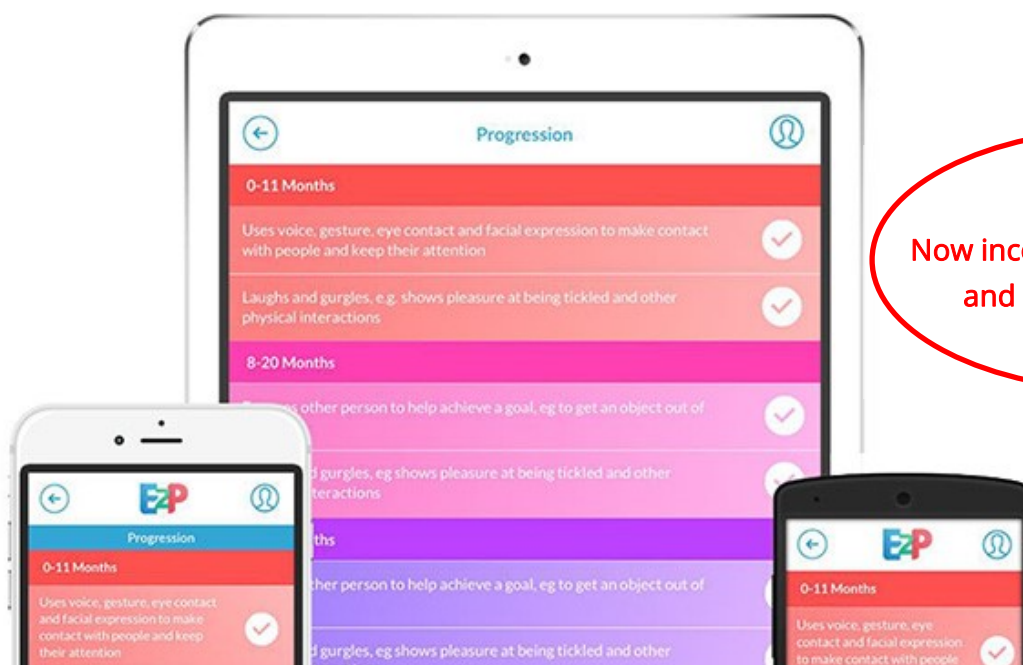

NEW
Now incorporating the pilot ELG and SEND pre-Key Stage standards

KEY BENEFITS

Fulfil your assessment and reporting requirements

- Direct, automated import of all the key class, year group and child data from your MIS (e.g. SIMs, Integris G2, Arbor).

- Formative assessment of children with wide ranging needs including SEND.

- Internal and external moderation capability including the creation of shared exemplification files, with photo and video evidence.

Save time for busy teachers

- No replication of data input. No manual data analysis.

- Comprehensive live, online reports and analysis for school leaders, teachers, parents and children.

- The latest mobile App technology for Teachers and Parents (video, photo, and audio).

Keep your Data Safe

- Ensure pupil's highly confidential data is kept safe, using our best in class, GDPR compliant and secure architecture.

Encourage parental engagement

- Parents access the system via their own login and can also contribute evidence of home learning.

- E2P+SEND is a multilingual package – communicate reports with parents / carers in their own language.

E2P is there to support you throughout

- We provide one to one training and dedicated phone and email support, allowing you to get on with your job, and making sure you are guided through the set up and beyond.

About Us

E2P+SEND is developed by teachers for teachers. The team has extensive education experience, much of it in senior leadership roles.

Our solutions are based on more than 10 years of providing online assessment tools and are used in many schools nationally.

We provide robust and proven systems for formative assessment and reporting of development.

We are proud to include all children, regardless of need. We continue to be committed to helping school leaders, teachers, parents and their children to drive and take ownership of personalised learning.

"I think that E2P is a wonderful tool for assessing early years as well as providing an online learning journey for parents and staff. As phase leader it is such a valuable tool for data analysis too."
